

*Prospective Student
Any Address
Any Place, Any Where*

*Dear Prospective Student,
Thank you for your interest in aviation and our school. Please allow me to introduce you to us. We will be glad to supply additional information per your request.*

U S Flight Academy is located on the superb facilities of the former Webb Air Force Base in Big Spring, Texas, was established in 1988, and is dedicated to offering personalized instruction to suit the student's requirements, needs, and wishes. West Texas is well known for its clear weather and mild winters which creates the best flying weather in the world.

We offer personalized one-on-one training and maintain a small school atmosphere, which allows students to learn at their own pace. We do, however, challenge, motivate, and teach you to become the safest, most proficient pilot you can be. This philosophy is also maintained in our Professional, accelerated programs.

We offer private and professional courses. All material, equipment and FAA exam fees are included in the course price and we strive to make aviation training affordable. Please view our web presentation www.usflightacademy.org for additional course information.

We take pride in being a student oriented institution, and continue to work everyday not only to maintain but also strengthen our dedication to our students. For example, we have written our own flight training curriculums displaying intensive, structured training. Also, we provide the necessary flight training that leads to you earning the FAA certifications that are required for the completion of your internet based Utah Valley University (UVU) Professional Pilot Degree, where you are able to obtain your bachelors or associate degree as a professional pilot through the internet and your "lab" or flight training at U S Flight Academy. By choosing aviation electives initially a Commercial pilot's certification can be achieved within a year and you can therefore build your aeronautical experience to meet airline requirements while completing the degree work, and therefore saving two to three years compared to traditional training.

We have excellent accommodations at student prices, and are also a FAA Authorized Computerized Testing Center.

Thank you again for your interest in our school and please do not hesitate to contact again if any question.

Sincerely,

A handwritten signature in blue ink, appearing to read "Rosa Rickabaugh".

*Rosa Rickabaugh
